

Foley.

Video as a build artifact.

THE PROBLEM

Every product walkthrough
goes stale the moment you
ship.

WHAT IT IS

Foley rebuilds your walkthrough video from the codebase — every PR.

LIVE

Demo.

PR opens · video updates · we cut it in the editor · we publish.

WHAT'S IN THE BOX**Auto-capture**

Playwright records every step on every PR.

**AI narration**

ElevenLabs reads the script in your brand voice.

**Music beds**

Generated to fit length and tone — no licensing.

**Title cards**

Aurora gradient + screenshots + typed text.

**Nano Banana**

Gemini composes mockups from real frames.

**Multi-format**

MP4, WebM, GIF, MP3, project bundle.

BUILT IN 26H**EXISTING**

Walkthrough YAML

Continuous narration synth

Editor scaffolding

NEW IN 26H

Title cards composited into export

Multi-format export (MP4 · WebM · GIF · MP3)

Multi-select · split · duplicate · search

Project bundle · YAML-aware undo
20-fix polish + crash hardening

WHO · WHY NOW

For dev tools that ship daily — AI is finally good enough to narrate, mix, and composite without us.

Your video stays current.
